### Is Your Partner Cheating?

Few people enter a relationship with the explicit intent of committing infidelity. However, the truth is that cheating is a reality for many couples. If you suspect your partner is cheating, you've got a lot to think about. What if you accuse your spouse of cheating and it's not true? What if they deny it? How will things change? Can you ever go back to being normal again? When an affair comes to light, it's easy to recognize the signs were there all along—you just missed them. But the signs, whether the affair is purely physical or emotional, are often subtle.

Keep an out for these warning signs:

- Secret phone or computer use
- They change their appearance
- They develop random new interests
- Periods where your significant other is unreachable
- A change in your intimacy
- Feels of hostility toward you and the relationship
- Unexplained expenses
- An altered schedule
- Faded emotional connection
- Deflection when the topic of cheating is brought up

Now it is important to note that just because your significant other may display some of these tendencies does not necessarily mean they are cheating. On the other hand, they could display none of these, and still be unfaithful. No one knows your partner like you do, so for many it's that gut instinct, that pit in your stomach that sets off your alarm bells.

Some may think hiring a private investigator to put an end to these doubts may be too invasive, but sensitivity and privacy are paramount when conducting a [private investigation](#). In the end, many clients walk away feeling either relieved that their spouse was in fact telling the truth and can move on, or that their suspicions were in fact, substantiated all along. BCSI has a high success rate in this type of investigation and would be happy to provide a confidential, free consultation over the phone. You can call our office at 604-922-6572 or contact us via our website at <https://www.picanada.ca/contact-us/>.
