

THE INVESTIGATOR

Is Someone "Bugging" You?

Our growing interest in information security is a good thing, but amidst all the new risks, we should not forget that the tried-and-true approaches to spying are more of a threat than ever. Recording devices commonly called "bugs," are something we often see in movies about FBI agents or the CIA, but they also exist in everyday life.

About Us

Since 2000, BCSI Investigations Inc. has performed thousands of successful investigations. Our integrated team of investigators and support services ensure that the investigations are conducted in a timely fashion with leading edge techniques. BCSI Investigations Inc. is considered the platinum standard of the industry based on the quality and the wide spectrum of its services as well as the expertise of the investigators.

Corporate offices, residential homes, and vehicles are just a few places these devices have been found and can result in devastating consequences left undetected. Companies with new and innovative technologies can be at risk of [corporate espionage](#) and insider threats, or even a personal dispute could land one of these devices in your belongings without your knowledge.

Modern surveillance technologies are discreet, highly capable, and exceedingly difficult to locate. Even the smallest device can pack a considerable amount of technology. These devices can be integrated into light bulbs, USB cables, or any number of other everyday objects. According to [Section 184\(1\)](#) of the Criminal Code of Canada, "Everyone who, by means of any electro-magnetic, acoustic, mechanical or other device, wilfully intercepts a private communication is guilty of an indictable offence and liable to imprisonment for a term not exceeding five years."

Bug sweeping, or [Technical Surveillance Countermeasures \(TSCM\)](#), play an essential role in detecting, locating, and removing malicious surveillance devices intended to capture and transmit private information from corporate offices, governments, houses, or anywhere you suspect a recording device. What TSCM services provide is peace of mind to the individual who loses valuable time worrying about eavesdroppers and may have justified anxiety about their physical security as well.

BCSI provides complete residential and corporate office TSCM services regarding transmitting and covert recording devices. Our experienced investigators can provide a company or individual discreet and thorough sweeps in any and all areas of concern. We can also implement a TSCM program with your company to ensure ongoing security services.

To learn more about BCSI's TCSM services, call our office to speak to one of our experienced investigators at 604-922-6572 or contact us through our [website](#).
