

## The Investigator Newsletter

### AI (Artificial Intelligence) & Crime - Part One

We now live in an era in which AI (Artificial Intelligence) is a reality, which deeply impacts our daily lives. Some companies use AI (Artificial Intelligence) to detect anything from daily employee theft to insider trading and even predict and prevent crimes.

#### About Us

Since 2000, BCSI Investigations Inc. has performed thousands of successful investigations. Our integrated team of investigators and support services ensure that the investigations are conducted promptly with leading-edge techniques.

With over 40 years of combined experience, BCSI Investigations Inc. is

#### Risks AI (Artificial Intelligence) Poses

The increased use of AI (Artificial Intelligence) tools for crime prevention could cause external risks to cascade unexpectedly. While AI (Artificial Intelligence) can automate simple tasks, it can also be used unlawfully while impacting [companies](#) and individuals.

AI (Artificial Intelligence) crime can be as small as automated spam advertising or artificially created media for humour. While the topic is still relatively new, anyone with a general understanding of computers will be able to create and manipulate media. This is done through software such as 'StableDiffusion,' which can generate images simply from the text you input. With that being said, the dangers can be much greater where privacy is compromised or acts of

the platinum standard for private investigations.

terrorism can ensue.

Past crimes include identity manipulation, where entities such as government officials, celebrities, and other popular figures are targeted for various reasons. A recent example is when Ukrainian President Volodymyr Zelenskyy was captured in a deep-fake video telling his soldiers to retreat when the event never occurred. These individuals can be either targeted in an attempt to destroy their public image or be used in scams by criminals to advertise a product the popular figure has no idea about.

Identifying AI (Artificial Intelligence) is critical to staying safe online and preventing identity dishonesty. If you feel you are a target of [AI \(Artificial Intelligence\)](#), report it to local authorities immediately.
